SSC

PROJECTS

MEDIVOX–THE CONVERSATIONAL HEALTHCARE BOT **2024**

- Developed a conversational health carebot that allows users to ask health-related questions through voice or text
- Integrated speech recognition and NLP to provide personalized responses and symptom-based suggestions
- Enabled features like appointment assistance, healthtips, and emotional support for users
- Aimed to make healthcare interaction easier and more accessible through smart, natural conversations.

IMAGE TRANSLATION AND RECONSTRUCTION USING ASINGLE DUAL LIGHTWEIGHT ENCODER **2025**

- Built a system that can colorize grayscale images and reconstruct thermal images using one shared model
- Used a lightweight encoder and multiple generator stored processing time and improve accuracy and quality
- Achieved high-quality output validated through metrics like PSNR, SSIM,and FID
- Designed to work efficiently even on low-resource systems

IMPLEMENTED A PERSONAL PORTFOLIO **2025**

- Designed and implemented a **responsive personal portfolio** website using **HTML, CSS, and Bootstrap**
- Demonstrated frontend development skills and personal branding through effective design and structure
- Showcased academic projects, technical skills, and resume in a clean
