SSC

PROJECTS

MEDIVOX–THE CONVERSATIONAL HEALTHCARE BOT   **2024**
• Developed a conversational health carebot that allows users to ask health-related questions through voice or text
• Integrated speech recognition and NLP to provide personalized responses and symptom-based suggestions
• Enabled features like appointment assistance, healthtips, and emotional support for users
• Aimed to make healthcare interaction easier and more accessible through smart, natural conversations.

IMAGE TRANSLATION AND RECONSTRUCTION USING ASINGLE DUAL LIGHTWEIGHT ENCODER   **2025**
• Built a system that can colorize grayscale images and reconstruct thermal images using one shared model
• Used a lightweight encoder and multiple generator stored processing time and improve accuracy and quality
• Achieved high-quality output validated through metrics like PSNR, SSIM,and FID
• Designed to work efficiently even on low-resource systems

IMPLEMENTED A PERSONAL PORTFOLIO   **2025**
• Designed and implemented a **responsive personal portfolio** website using **HTML, CSS, and Bootstrap**
• Showcased academic projects, technical skills, and resume in a responsive way
